 Islamabad, Pakistan

Profile

Frontend-focused Software Engineer with 3+ years of experience in Angular, TypeScript, and modern full-stack development. Skilled in scalable UI, API integration (Node.js, NestJS, MySQL, MongoDB), and secure authentication (AWS Cognito, Lambda, 2FA). Strong in debugging, unit testing (Jasmine/Karma), and enforcing clean code with SonarQube. Delivered NFT marketplaces, social media dashboards, and logistics platforms with a focus on performance, usability, and security.

Projects

- Dividis® SMM – Social media management platform with scheduling, analytics, and multi-account support.
- NodeChain® NFT Marketplace – NFT dashboard with gasless trading and secure payments.
- Webtool Dashboard – Full-stack portal streamlining competitor evaluation in logistics.
- Dezemaat® Dashboard – Angular + NestJS platform for managing Islamic content (videos, Quran, PDFs).

Education

NUML, Islamabad

2016 - 2020

Bachelor's in Computer Sciences

Certification

MEAN stack development - Coursera

Tech Stack

- Frontend: Angular, TailwindCSS, Bootstrap, Material UI, ng-Bootstrap, PrimeNG
- Backend: Node.js, NestJS, MySQL, MongoDB
- Auth & Security: AWS Cognito, Firebase Auth, JWT, TOTP, Email OTP
- Cloud & DevOps: AWS Lambda, API Gateway, S3, Serverless, CI/CD (GitHub Actions)
- Testing: Jasmine, Karma, Jest, Unit & E2E Testing
- Tools & Collaboration: Git/GitHub, Jira, Agile/Scrum, Postman, Figma

Experience

Solis Solutions

April 2020 - Dec 2022

- Built NFT marketplace dashboard with secure login & crypto transactions.
- Created Social Media Manager platform with Facebook/Instagram API, supporting post scheduling & analytics.
- Developed Islamic content dashboard(Dezemaat) (Angular + NestJS), enabling video/PDF uploads with full CRUD.
- Upgraded and maintained Angular versions, ensuring compatibility with the latest framework features and best practices.
- Resolved software bugs and provided continuous application support, ensuring high system reliability and performance.
- **Results:** Improved user engagement by 40% through responsive UI and streamlined APIs.

SwipBox

Jan 2023 - current

- Integrated AWS Cognito + Lambda for secure 2FA (OTP + Authenticator App).
- Developed gallery management system (upload, crop, watermark) used by 1,000+ assets.
- Built CSV bulk import functionality to streamline data management and improve efficiency.
- Improved courier management dashboards, supporting first & last-mile logistics.
- Implemented dark mode support to enhance user experience and accessibility.
- **Result:** Reduced bugs by 25% through unit tests (Jasmine/Karma) & enforced SonarQube rules.
